MANAGEMENT REPORT

A Profit before tax amounted to DKK 257.6 million, compared with DKK 256.1 million as at 30 September 2025, representing an increase of DKK 1.4 million, or 0.6%. This is considered satisfactory. In the third quarter, an impairment charge of DKK 6.4 million was recognised on two owner-occupied properties following a routine inspection by the Danish Financial Supervisory Authority in June 2026.

Following the Danish Financial Supervisory Authority's review of the bank's key areas of operation, five regulatory orders were issued, including one requiring an impairment charge of DKK 6.4 million on the bank's owner-occupied properties. The other four orders were more administrative in nature, and the bank has already made substantial progress towards complying with them. The visit did not give rise to any changes in impairment related to credit exposures or solvency requirements, and neither did it result in orders on risk areas.

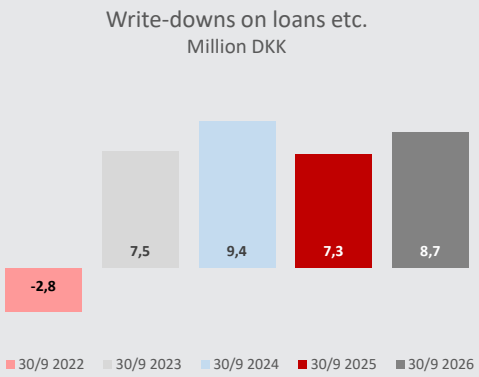

Net interest and fee income increased by DKK 24.7 million or 5.1%, due to increasing business volume in all business areas in the bank.

The exchange rate adjustments were positive by DKK 28.8 million, compared with DKK 20.7 million in the same period in 2025. The higher exchange rate adjustments are attributable to exchange rate adjustments on sector shares, which were DKK 12.4 million higher than in the corresponding period last year, while exchange rate adjustments on bonds were DKK 7.5 million lower. Dividends in the same period decreased by DKK 11.0 million.

The costs for staff and administration have increased by DKK 24.8 million or 10.2%, as a result of the number of employees increasing by 22, primarily in the bank's newest branches, as well as increasing costs for marketing and IT.

The increase in costs is a result of the bank investing in current and future organic growth. Among other things, the bank's latest branch on the island of Amager opened its doors at Islands Brygge on 1 April 2026. In 2026 the bank increased staffing levels in established branches and headquarters to ensure that both the existing and the many new customers can be served satisfactorily. It is a key element of the bank's business model to follow the bank's key values, including presence and drive, which requires both investment in employees and in effective processes, even if in the short term it impacts the cost ratio. This supports the bank's strategy of organic growth, where a very satisfactory increase in activity is being achieved in all areas.

Marketing expenses are increasing as a result of the bank's 11 branches entering partnerships with local associations etc. on an ongoing basis, which contributes to the development the bank conducts in the local areas and to the bank being rooted in the local communities.

The increased IT expenses are naturally related to the bank's solid growth, as well as the general development of good, well-functioning IT systems for the bank's customers and employees. The bank also invests in automation of processes where data is used to minimise administrative work, freeing up time to advise the bank's many customers.

Core earnings were realised at DKK 254.2 million, compared with DKK 252.8 million in the same period in 2025.

Impairment
Impairment was realised at DKK 8.7 million, compared with DKK 7.3 million as of 30 September 2025. Management has maintained its estimate of DKK 100 million for potential losses arising from uncertainty surrounding the war in Europe, general global tensions, the Green Tripartite Agreement in the agricultural sector and uncertainty about interest rate developments.

The derivative effects of geopolitical uncertainties continue to give rise to increased uncertainty for both the business community and private households, but the creditworthiness of the lending and guarantee portfolio is solid and continually reinforced.

The bank is in close dialogue with all business customers and it is positive that the aforementioned negative factors have not significantly influenced the credit quality of the business portfolio. The increased risk factors may cause certain industries to be affected, which is why the bank has taken a cautious approach in calculating the risks in the business segments.

Pig producers are facing low settlement prices, while considerable political uncertainty surrounds the future of pig farming in Denmark. The bank is following developments closely and maintains an ongoing dialogue with individual customers about their operating finances, liquidity and future prospects. It is generally the bank's assessment that the exposure to pig producers is robust, and the bank is therefore reassured by the overall credit quality of the exposures within the sector.

The private customer segment is robust and we have almost always succeeded in finding solutions when individual customers experience challenges in their finances.

The bank's general policy has been to make every effort to find solutions to temporary problems experienced by business and private customers.

Lending growth
Lending grew by 14.3% as at 30 September 2026 compared with 30 September 2025. Although this represents substantial growth, it is consistent with the bank's strategy of organic growth. The lending volume in 2026 increased by DKK 899.2 million, or 12.2%, which supports an expectation of a lending increase for the full year of 14-16 %, based on lending to the bank's many new customers and the establish-

ment of loan facilities for existing customers.

The bank's lending growth is largely due to lending to the bank's many private customers, including loans for home financing, where there is high activity and growth in both the Jutland branches and in the Copenhagen area. The growth is not a result of a changed strategy regarding home financing and the bank generally continues to provide the majority of home financing through Totalkredit and DLR Kredit. The bank offers mortgage-like loans, but they are rarely used and only in customer cases where there are special circumstances that make this the best solution for the customer.
As can be seen from the industry breakdown below, the proportion of lending and guarantees to private customers has increased to 61.8%. The bank is very comfortable with the development, as there is underlying growth in both the business and private segments.
The objective for the business area is that the exposure to a single business segment should comprise 15% at maximum, and this is met by a satisfactory margin. Exposure to the 2 largest business segments, agriculture and real estate, were respectively 7.6% and 7.5%.

The bank's guarantee volume has increased by 16.4% to DKK 2,527.3 million as of 30 September 2026 compared with DKK 2,170.5 million as of 30 September 2025. The increase is due in particular to a large increase in guarantees in connection with private housing transactions.

The bank offers financial leasing to business customers via Skjern Bank Leasing. The activity is increasing and there are 761 active leases as of 30 September 2026, with a residual lease debt of DKK 300.7 million.

The bank's overall credit provision has increased very satisfactorily by DKK 3,556.7 million in the past year.

There is an increase in activity in both the bank's lending and the arrangement of mortgage credit via Totalkredit and DLR Kredit. Loans arranged through Totalkredit and DLR Kredit have increased by 12.8% and 8.1%, respectively, representing a total increase of DKK 2,517.8 million over the past year, equivalent to 11.6%. It is therefore very satisfying to determine that the bank's lending growth is not taking place at the expense of growth in the volume of facilitated mortgage loans for Totalkredit.

The bank's strategy remains to finance residential properties primarily through mortgage loans, using priority loans or similar loan and credit products only to a limited extent.

CAPITAL CONDITIONS AND DIVIDEND POLICY

The capital base increased by DKK 101.5 million compared to 31 December 2025 and amounts to DKK 1,948.1 million as of 30 September 2026. Despite the increase in the capital base, the capital ratio decreased to 24.1%, compared with 25.3% at the end of 2025. The reduction in the capital ratio is primarily attributable to an increase of DKK 795.2 million in risk-weighted assets in 2026 as a result of higher activity levels. The core capital ratio amounts to 22.5% compared to 24.3% as of 31 December 2025.

The individual solvency requirements are calculated at 10.1%, with a solvency surplus of 14.0 percentage points. Compared with the capital base of DKK 1,948.1 million, as of 30 September 2026, the bank has a surplus of DKK 1,130.0 million relative to the solvency requirement.

Based on the required capital ratio of 21.2%, comprising the bank's calculated solvency requirement plus buffer requirements, including an NEP supplement of 5.6 percentage points and an unchanged systemic property buffer of 0.5 percentage points, the bank has a surplus of 2.9 percentage points, equivalent to DKK 229 million.

In September 2026, the bank repaid DKK 60.0 million in hybrid core capital and took out a Tier 2 loan of DKK 50 million, thereby reducing its capital base by DKK 10.0 million.

The realised profit after tax of DKK 199.3 million has been reviewed by the bank's external auditors and the profit is added to the actual core capital as of 30 September 2026.

The management will have a high focus on ensuring that the bank has a solid capital base to support the continued development of the bank's activities and implementation of current and future regulatory capital requirements. Capital reserves have decreased to 2.9 percentage points as a result of significant growth in the bank's lending and guarantees, but are still considered satisfactory, primarily because of the bank's earnings.

The capital base will continue to be primarily based on core capital, but raising foreign capital may also be included in the future capital structure. The process of raising the new capital loan in September 2026 confirmed that the bank has satisfactory access to the capital markets.

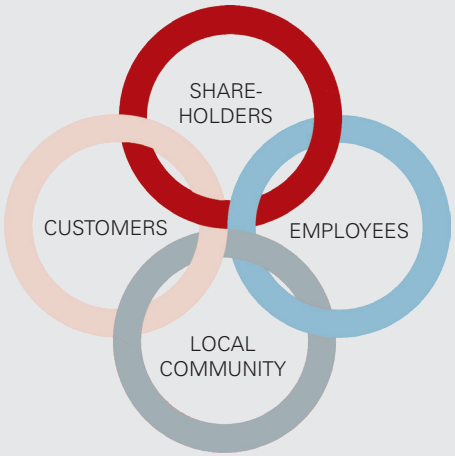

A share buy-back program of DKK 3.5 per share has been initiated in Q1 2026. The current share buy-back program follows the "safe harbour" rules and is going according to plan.

The bank's management has decided to maintain the following capital goals and distribution policy:

Capital goals
It is the Bank's goal to be well capitalised to ensure the Bank's strategic goals and also to accommodate regulatory requirements in future recessions. The management will continuously assess the adequacy of the capital base, including the distribution between equity and foreign capital, to ensure the optimal distribution between returns to shareholders and sufficient increase of the Bank's actual core capital.

Dividend policy
With regard to its capital goal, the Bank wants to be stable in distributions. The goal is for distributions, either as share buybacks, cash dividends or a combination thereof, to amount to 30-50% of the annual profit after tax, which exceeds a return on equity of 6%.

In Q4, the bank's Board makes the final assessment of the level of dividends for each year in question based on the dividend policy. During the year, the share of expected dividends for the period is withdrawn from the calculated capital base based on the dividend policy. As of 30 September 2026, DKK 56.4 million was withdrawn from the capital base. It is believed that the capital goal and distribution policy meet the long-term interests of shareholders and the bank optimally. The shareholders achieve a reasonable distribution and the bank's capital base is strengthened by consolidation.

THE BANK'S IMPORTANT STAKEHOLDERS

The bank's management considers the cooperation with and involvement of the bank's many stakeholders and the running of a well-functioning local Bank to be equally important.
The focus has always been on creating value for the bank's stakeholders, which is considered to have been the most important factor in the solid business development. The bank's strategic objective is primarily a controlled organic growth based on long-term relations with all stakeholders.

When the customers choose the way the bank is run, it increases the profits to the benefit of the shareholders. The local community benefits from this in the form of the bank's local backing as well as product distribution to local businesses and private customers. The employees benefit from this in the form of job retention and an exciting job where they can develop. The customers clearly express that it is valuable to have

a local bank that knows their needs and where they have an adviser who knows them and who back the local community's activities.

Shareholders
The management recognises the importance of a stable and loyal shareholder community and aims to give them competitive returns. The shareholders' loyalty and continued backing, from small shareholders to major professional investors, are extremely important to the continued development of the Bank.

Customers
It is highly satisfactory that the private customer business is growing rapidly and that the bank is being chosen by new customers from most of the country, primarily on the recommendations of existing customers. The business customer area is to continue to be developed, and it can be noted that there is a solid development with a focus on small and medium-sized business customers in the bank's local areas.

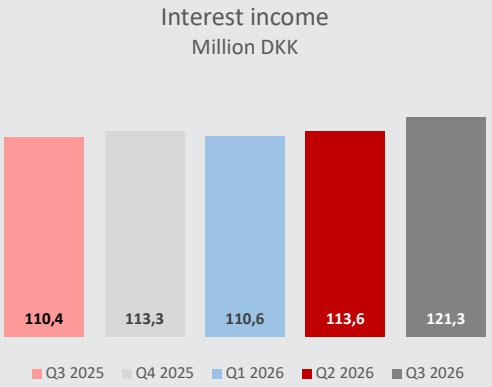

In the annual customer satisfaction surveys, the bank's customers unanimously declare that it is the close personal relationships they enjoy with their advisers that are key to their choice of bank. This combined with good product solutions and solid advice, as well as the electronic options, such as on-line meetings and mobile banking, make daily operations smooth and flexible.

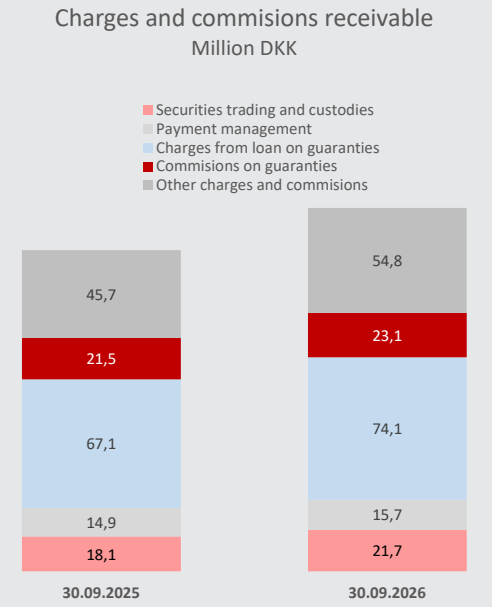

The annual independent survey of customer satisfaction, which is of paramount importance to the bank, is carried out by Finanssektorens Uddannelsescenter, and for a number of years, this has clearly shown that the bank's customers are very satisfied with the bank on all parameters, which we are very proud of and humbled by.

It is very encouraging to note that customer satisfaction with the bank has improved since the latest measurements. The bank is very grateful and humbled by the trust shown by the customers as they refer their business contacts, family and acquaintances to the bank in large numbers.

Employees
As of 30 September 2026, the bank employed 260 employees, which is an increase of 22 employees in the last year. All employees are offered employment terms that conform to the market as well as relevant training and continuing education in order to always ensure a high level of professionalism.

Employee job satisfaction is important to the bank, and annual job satisfaction surveys are conducted. The latest survey from September 2026 showed that a full 99.6% of the bank's employees consider the bank to be a very good place to work and that they are also proud to work at the bank. The satisfaction with working at Skjern Bank is also considered to be reflected in the bank's retention rate, which has continuously ex-

ceeded 90% in recent years. Stable and satisfied employees contribute to ensuring a good foundation for maintaining the employee culture in the bank despite the increasing number of employees.

It is a strategic goal to have employees who find the bank to be a good workplace, which is considered crucial to have significant interest from qualified applicants for vacant positions.

Local communities
The goal is to play an important role in all of the Bank's local communities, both as a partner for the business owners, but of course also for the local population in general. It is important for the Bank to back local initiatives, and the Bank assists a great number of businesses – entrepreneurs and existing businesses - with counselling and financing, so that ideas and investment goals have the best chance of being realised.

The Bank is also a partner for many local community associations and organisations and supports both sports and culture and associations in general. The commitment to and support for local communities is largely based on reciprocity and in expectation and under the assumption that the Bank will be rewarded with customer referrals and a generally positive attitude towards the Bank.

The foundation of Skjern Bank is the many shareholders, customers, employees and the local communities of the Bank's market areas. The Bank is aware that all stakeholders play an important role both now and in the future and views it as an important community role to encourage the many stakeholders to work together for the benefit of both the stakeholders and the Bank.

NET INTEREST INCOME

Interest income amounted to DKK 345.5 million, which is an increase of DKK 2.1 million, corresponding to 0.6%, compared to the same period last year.

Interest expenses for deposits amount to DKK 26.9 million and have been reduced by DKK 10.6 million compared to the same period last year. Interest expenses on subordinated loan capital have been reduced by DKK 0.8 million. Total interest expenses amounted to DKK 30.9 million

Net interest income during the period increased by DKK 13.5 million compared to 30 September 2025, corresponding to 4.5%, and amounts to DKK 314.6 million.

The interest rate on the bank's deposits in Danmarks Nationalbank in September 2026 has increased by 0.25 percentage points to 2.10%, and the expectation in the market is that the key interest rate will increase

further in the coming quarters, but this remains uncertain.

The increasing interest rates are expected to slow the rising pressure on the bank's lending rates that has been observed in recent quarters, and it is expected that this will contribute to stabilising the bank's interest margin. However, the interest margin is expected to continue to be affected by competition in lending in both the private and business sectors.

NET FEE AND COMMISSION INCOME

Net income from fees and commissions amounted to DKK 185.8 million, compared to DKK 163.5 million in the same period in 2025, and thus increased by DKK 22.3 million. The bank is seeing increasing income from all fee types, which can be attributed to very high activity in all areas. There is increasing activity in the housing, pension and investment area, while the increase in the number of customers means other fees will increase. Lending fees increased by DKK 6.9 million, whilst earnings from securities trading and deposits increased by DKK 3.6 million.

Guarantee provisions increased by DKK 1.6 million, while payment services and other fees increased by DKK 10.0 million. Expenses paid for fees and commissions are DKK 3.6 million and at the same level as last year.

DIVIDENDS

The bank's dividend income amounted to DKK 13.7 million as at 30 September 2026, compared with DKK 24.7 million as at 30 September 2025. The decrease of DKK 11.0 million is primarily due to a change in the date of payment of dividends with BankInvest, but also that the bank has reduced its shareholdings in DLR Kredit A/S and Sparinvest Holding, resulting in a lower payment of dividends.

NET INTEREST AND FEE INCOME

Net interest and fee income increased by a total of DKK 24.7 million, corresponding to 5.1% compared to the same period in 2025, and amounts to DKK 514.1 million.

EXCHANGE RATE ADJUSTMENTS

The total exchange rate adjustments were positive by DKK 28.8 million, compared with DKK 20.7 million as of 30 September 2025. The difference is primarily attributable to value adjustments on sector shares, which were DKK 12.4 million higher than in the corresponding period last year, and value adjustments on bonds, which were DKK 7.5 million lower. The exchange rate adjustments were divided into DKK -2.4 million in the

bond portfolio and DKK 20.6 million in the shareholdings, of which sectoral shares comprise DKK 18.3 million. Exchange rate adjustments on shares in the trading portfolio are thus positive by DKK 2.3 million. In addition, satisfactory income of DKK 10.6 million has been achieved on currency and derivative financial instruments.

The bank's strategy in the securities area is structurally cautious and the significant fluctuations on the markets did not lead to changes in the overall strategy. Value adjustments on the bank's bond holdings were lower than in the corresponding period last year due to rising interest rates.

EXPENSES

Costs for personnel and administration etc. were DKK 24.8 million higher than the same period last year in 2025 and amount to DKK 267.3 million. Personnel costs increased by DKK 13.8 million and administration costs increased by DKK 10.9 million, broken down between IT costs, marketing and other administration costs.

The increase in personnel expenses is primarily attributable to an increase of 22 in the average number of full-time equivalent employees, particularly customer advisers serving the bank's many existing and new customers, as well as additional staff at head office to handle the growing workload associated with the bank's satisfactory overall business growth. There were also general wage increases under collective agreements.

PROFIT FOR THE PERIOD

Profit before tax amounted to DKK 257.6 million compared with DKK 256.1 million as of 30 September 2025.

After taxes, profit for the period amounts DKK 199.3 million, an increase of DKK 15.8 million, which is very satisfactory. Internally, the bank is focused on the activity level, and it is satisfactory here that the business volume in all branches and business areas, including distribution of products such as mortgages, insurance, investments and pensions, is increasing.

Core earnings of DKK 254.2 million were realised, which is DKK 1.4 million higher than 30 September 2025:

CORE EARNINGS 1 JANUARY - 30 SEPTEMBER

*) Foreign currency value adjustments and value adjustments specificeres i noten "Value adjustments" on page 26.

MAJOR SHAREHOLDERS

As of 30 September 2026, the bank has, unchanged, four major shareholders, all of whom have 5% of the voting rights:

Investeringsselskabet af 15. maj (AP Pension Livsforsikringsaktieselskab, Copenhagen Ø.), which as of the most recent ownership report held 20.75% of the share capital, Heine Delbing, who personally and via the companies Olalde Holding ApS, Evostate Invest ApS and Storegade ApS, who as of the last ownership report held 10.0% of the share capital, EURO STEEL 1988 APS, which as of the most recent ownership report held 5.15% of the share capital, and Kim Pedersen, who both personally and via his wholly-owned company Immoinvest.dk ApS held 5.0% of the share capital as of the most recent ownership report.

LIQUIDITY

Pure customer deposits amounted to DKK 10,772.2 million, including pool schemes accounting for DKK 13,831.2 million, of which DKK 10,880.5 million is covered by the Danish Deposit Guarantee Scheme. The deposits are considered stable, since most of them come from core customer relationships.

The bank's liquidity reserves are solid. The LCR (Liquidity Coverage Ratio) liquidity reserves of DKK 3,185 million exceeds both the regulatory requirements and the stricter liquidity goals established by the bank's Board of Directors. The liquidity coverage ratio shows how the bank is able to meet its payment obligations for an upcoming 30-day period without access to market funding. The ratio is calculated by comparing the bank's cash reserves and liquid assets with the bank's payment obligations for the next 30 days calculated according to certain rules.

The bank has established an internal limit for the minimum liquidity reserves of 175%, which exceeds the minimum requirements of 100% from the Danish Financial Supervisory Authority. The bank achieved the goal and as of 30 September 2026 has an LCR financial ratio of 343%.

The liquidity reserves measured according to NSFR (Net Stable Funding Ratio) is 140%, while the bank's internal limit for this is set to 120%, and the minimum requirement from the Danish Financial Supervisory Authority is 100%. The ratio indicates the required amount of stable funding that the bank must hold at the current liquidity profile for the assets it finances and the potential liquidity withdrawals that may arise from credit commitments and other off-balance sheet items.

SKJERN BANK SHARES

The bank is owned by upwards of 15,000 shareholders. The share price was 446.5 on 30 September 2026, compared with 230.5 as of 30 September 2025. Market value amounts to DKK 4,200.7 million, corresponding to a rate/intrinsic value of 2.04.

EXPECTATIONS

On 2 September 2026, the bank raised its expectations for both the core earnings and the profit before tax. For the full year, expectations for core earnings have been revised upwards from DKK 315–335 million to DKK 330–350 million, while expectations for profit before tax have been revised upwards from DKK 310–335 million to DKK 330–355 million.

"THE SUPERVISORY DIAMOND"

The Danish Financial Supervisory Authority's mandatory Supervisory Diamond specifies four indicators for banking activities with increased risk.

The Bank's status on the individual benchmark as at 30 September 2026 is set out below

Liquidity reserve (minimum 100 %):
The liquidity reserve is still sufficient and amounts to 343 % as of 30 September 2026 compared to 404 % as of 31 December 2025.

Property exposure (maximum 25 %):
Property exposure is 7.5 %, compared with 7.5 % at the end of 2025.

Large exposures (maximum of 175 %):
Large exposures are defined as the total of the Bank's 20 largest exposures compared to the actual core capital, and the financial ratio was 105.8% compared with 104.2 % at the end of 2025.

Lending growth (maximum 20 %):
The Bank has realised a growth in lending of 14.3 % as of 30 September 2026 compared with an increase in lending of 6.2 % at the end of 2025.

TRANSACTIONS WITH RELATED PARTIES

There have not been any major transactions between Skjern Bank and the Bank's related parties during the period.

LITIGATION

The Bank is involved in disputes and litigation as part of its normal operations. The Bank's risk in these cases is regularly assessed by the Bank's lawyers and management. Provisions are made based on an assessment of risk of loss.

CONTRIBUTION TO THE SETTLEMENT FUND

The Bank's annual contribution to the Settlement Fund amounts to DKK 155 thousand and was paid during Q2 2026.

ACCOUNTING POLICIES USED

The semi-annual report was prepared in accordance with the Danish Financial Business Act, including the Danish Financial Supervisory Authority's Executive Order on financial reports for credit institutions and investment companies, etc. and additional Danish disclosure requirement for interim reports for listed companies.

The accounting policies used are unchanged compared to the annual report for 2025.

EVENTS AFTER 30 SEPTEMBER 2026

No events have occurred after the balance date that are of significance for the assessment of the profit for the period.

MANAGEMENT STATEMENT

We have on today's date discussed and approved the interim report for the period of 1 January – 30 September 2026 for Skjern Bank A/S.

The interim report was prepared in accordance with the Danish Financial Business Act, including the Executive Order on financial reports for credit institutions and investment companies, etc. and additional Danish disclosure requirement for interim reports for listed financial institutions.

We consider the accounting policies chosen to be appropriate such that the accounts provide a true and fair view of the bank's assets and liabilities, financial position and profit.

We consider the management's review to contain a true and fair view of the development in the bank's activities and economic conditions and a description of the significant risks and uncertainty factors by which the bank may be affected.

No audit or review of the interim report has been conducted, but an external audit has verified that the conditions for recognition of the period's earnings in core capital are met.

The development can be explained by the following development in the distribution in stages of the maximum credit risk and development in the weighted average of the rating:

	Stage 1	Stage 2	Stage 3
Beginning			
Impairment	33.326	107.797	186.215
- in % of total impairment	10%	33%	57%
Maximum credit risk	13.902.950	1.511.308	451.077
- in % of maximum credit risk	88%	10%	3%
Rating, weighted average	2,4	6,4	10,0
End			
Impairment	26.735	123.575	194.745
- in % of total impairment	8%	36%	56%
Maximum credit risk	17.129.203	1.569.818	537.183
- in % of maximum credit risk	89%	8%	3%
Rating, weighted average	2,2	6,3	10,0

As a result of the geopolitical and macroeconomic situation, including the wars in Ukraine and between Israel and Hamas, the uncertainty about the consequences of the introduction of the CO2 tax for agriculture and the outcome of Donald Trump's tariff wall, the bank has maintained a management estimate of DKK 100 million as of September 30, 2026.

The bank has made an estimate of increased impairment rates for the private, commercial and agricultural segments in the event of a cyclical downturn, which includes, among other things, that the bank has updated macro factors, benchmark calculations, etc.

The total management estimates are divided by DKK 20.0 million in stage 1 (30/9 2025: DKK 10.0 million), by DKK 60 million in stage 2 (30/9 2025: DKK 70.0 million) and by DKK 20.0 in stage 3 (30/9 2025: DKK 20.0 million).
